

Instrument and Associated Items

Item	Description	Price
RAD-LFC-1510	Radiance® Platform Instrument offering real-time, label-free cellular analysis utilizing Laser Force Cytology™. This system includes both the Illuminate™ Software Suite for comprehensive instrument control and ReportR™ cloud-based cell analysis software for fully-automated analysis and report generation. Unlimited data analysis support as well as method development and optimization services are also included, ensuring your processes and production workflows are built for success from the very start.	\$345,000.00
RAD-1510-MNT	Standard: Annual Radiance® instrument hardware and software maintenance contract. Includes parts and labor, remote technical support, LumaCyte engineer travel, preventive maintenance visits x2 per year, unlimited service calls, and hardware and software updates.	\$36,500.00
RAD-1510-MNT-PRI	Priority: Annual Radiance® instrument hardware and software maintenance contract. Includes parts and labor, remote technical support, LumaCyte engineer travel, preventive maintenance visits x2 per year, unlimited service calls, and hardware and software updates. Also includes unlimited method development and assay optimization, priority scheduling, next-business-day-response, and a dedicated account manager with personalized support and regularly scheduled check-ins.	\$57,500.00
OST-1	On-site training for the use of Radiance® instrument, the Illuminate™ Software Suite as well as LumaCyte's automated analysis and report generation software, ReportR®. This comprehensive training package also includes access to LumaCyte's online Laser Force Cytology™ training platform, which provides certifications upon completion.	\$15,000.00
IQ/OQ	Installation Qualification and Operational Qualification package for Radiance® hardware and software.	\$15,000.00
OQ	Operational Qualification package for Radiance® instrument. Can be added on to the preventive maintenance visits for an existing instrument hardware and software maintenance contract.	\$7,000.00
S-CFR11	21 CFR Part 11 software for GMP regulatory compliance. Annual software license includes audit trail and user login management.	\$15,000.00
S&H-RAD	Shipping, Handling, & Installation for Radiance®	\$9,500.00
COMP-500	Air compressor for Radiance® instrument air input.	\$2,500.00

Fluids and Accessories

Item	Description	Price
LFK-STB-3001	Stabilization fluid kit for Radiance® – 100 samples. Contains fluids, calibration cells, (1) 96-well plate, and 200 mL stabilization fluid. Stabilization fluid is used to dilute and resuspend cell samples for optimal performance during analysis with Radiance®.	\$680.00
LFK-SDF-7001	Sample dilution fluid kit for Radiance® – 100 samples. Contains fluids, calibration cells, (1) 96-well plate, and 200 mL sample dilution fluid. Sample dilution fluid is used to maintain viability while diluting/resuspending cell samples for proper system operation during analysis with Radiance®.	\$650.00
WP-3110-5	96-well plates designed to work with LumaCyte Radiance® instruments. Sterile, individually packaged. (5 ct)	\$47.00
WP-3110-10	96-well plates designed to work with LumaCyte Radiance® instruments. Sterile, individually packaged. (10 ct)	\$89.00
STBF-1600	Stabilization fluid, 200 mL – used to dilute and resuspend cell samples for optimal performance during analysis with Radiance®.	\$142.00
STBF-1700	Stabilization fluid, 400 mL – used to dilute and resuspend cell samples for optimal performance during analysis with Radiance®.	\$266.00
SK-1900	Storage kit – Radiance® storage vials. Contains vials and fluids required to put Radiance® into storage mode.	\$59.00
SDF-1600	Sample dilution fluid, 200 mL – used to maintain viability while diluting/resuspending cell samples for proper system operation during analysis with Radiance®.	\$112.00
SDF-1700	Sample dilution fluid, 400 mL – used to maintain viability while diluting/resuspending cell samples for proper system operation during analysis with Radiance®.	\$201.00
